ARTIST STATEMENT

I am always fascinated with the abundance of greenery and the natural landscape of Hawai'i and so when I learned of the partnership between the 'Alohilani Resort and the Hawaiian Legacy Reforestation Initiative (HLRI), I just had to explore this further. This mural is a snapshot of one's journey to deliver the infant trees of Milo, Koa and Sandalwood to her next destination alongside her companions - the three porcupine fishes and a pufferfish, Ophelia, Hummer, Sid and Nigel, who are also the residents inside the resort's Oceanarium. This main character, the surfer, can be me, you, your aunts, uncles, the past, present and the future generation to bring awareness to the importance of planting trees and rejuvenating the forests.
